Education

Delta Academy

Bachelor of Management Information Systems

Oct. 2020 – May 2024

Mansoura, Dakahlia

Summary

Recent graduate with a Bachelor's degree in Information Systems from Delta Academy, specializing in frontend development technologies. Proficient in HTML, CSS, and JavaScript, with experience in frameworks and libraries including SASS, Bootstrap and Vue.js, as well as PHP, mysql and Laravel. Demonstrated ability through academic and practical projects, with strong skills in creating responsive and user-friendly web interfaces.

Experience

Ministry of Communication and Information Technology (Depi)

Php Web Developer Intern

April 2024 – September 2024

Tanta, Gharbeia

I significantly enhanced my Front-end development skills through this internship, where I focused on:

- Completed an intensive training program in PHP Web Development, where I learned both fundamental and advanced PHP concepts.
- Gained practical knowledge in using MySQL for database design and management.
- Learned and applied Laravel in building advanced and scalable web applications.
- Developed numerous projects, including fully integrated web applications using PHP, MySQL, and Laravel.

Consulting of Computer and Information Center (CCIC) - Certification

Front-End Developer Intern

June 2023 – October 2023

Mansoura, Dakhalia

I significantly enhanced my Front-end development skills through this internship, where I focused on:

- Designing and implementing responsive and accessible web interfaces using HTML, CSS, and JavaScript.
- Collaborating with a team of developers to integrate backend functionalities into front-end designs.
- Utilizing modern frameworks and libraries such as Vue.js to enhance user interactions and streamline development processes.
- Conducting usability tests and gathering feedback to iteratively improve user interface designs.
- Learning agile development methodologies and version control systems to ensure efficient project management and code maintenance.

Zero Academy Courses

Front-End Developer - PHP Web Developer

June 2022 – April 2023

Online

I acquired my front-end development skills and backend expertise from Zero Academy. Key highlights of my learning journey include:

- Mastering foundational concepts of HTML and CSS, essential for creating structured and visually appealing web pages.
- Developing proficiency in JavaScript to add interactivity and functionality to web applications.
- Exploring advanced topics such as responsive web design and accessibility to ensure optimal user experiences across devices.
- Learning PHP, MySQL, and Laravel to build robust and scalable backend systems.
- Applying principles learned to real-world projects and assignments, enhancing my problem-solving and coding abilities.
- Keeping pace with industry trends and best practices through continuous learning and engagement with the Academy's resources.

Projects

Travice Car | *Html5, Css3, Javascript, Bootstrap, Wow.js*

September 2023

- Designed and developed a landing page for an automotive maintenance website using HTML and CSS.
- Integrated Bootstrap for responsive design and a cohesive layout.
- Implemented stunning effects using JavaScript and the wow.js library to enhance user engagement.
- Ensured compatibility across various screen sizes and devices for a seamless user experience.

Product Management System (CRUDS) | *Html5, Css3, Javascript, JSON*

October 2023

- Creating: Add new data entries and store them in both localStorage and the JSON file.
- Reading: Load and display data from the JSON file.
- Update existing data and save changes in both localStorage and the JSON file.
- Deleting: Remove data from both localStorage and the JSON file.
- Searching: Search for specific data entries.

E7seb Platform - Graduation Project | *Html5, Css3, Javascript, Wow.js*

November 2023

- Designing and developing an administrative accounting platform for financial companies using JavaScript as the primary programming language.
- Implementing a data storage system using LocalStorage to maintain data locally without the need for external APIs.
- Programming financial tables and budgets with JavaScript to enable companies to manage internal accounts efficiently and securely.

Prayer Times Website | *Html5, Css3, Javascript,Api, postman*

May 2024

- Website Development: Designed and developed a user-friendly and responsive website.
- API Integration: Utilized an API to fetch and display prayer times according to the selected city.
- Performance Optimization: Improved page load speed and overall site responsiveness.
- User Interface Design: Created an interactive interface for users to select a city and view prayer times.

CRUDS Project | *Html5, Php, Mysql*

June 2024

- Developed a CRUD application using PHP that involved creating, reading, updating, and deleting records in a MySQL database.
- The project included designing user interfaces with HTML and CSS, handling server-side logic with PHP, and ensuring data validation and security.
- Tested the system to ensure all functionalities, including search, worked correctly and smoothly, making performance enhancements as needed.

Technical Skills

- | | | |
|--------------|--------------|----------------|
| • Html5 | • OOP | • SQL |
| • Css3 | • Ajax | • Git - Github |
| • Bootstrap | • Vue.js | • Laravel |
| • Sass | • Typescript | • Mysql |
| • Javascript | • Php | |

Languages

- | | |
|----------|-----------------|
| • Arabic | • English(Good) |
|----------|-----------------|

Other Skills

- | | | |
|------------------|-----------------------|-------------|
| • Communication | • Problem Solving | • Photoshop |
| • Self-education | • Attention to detail | |
